# Saxon Math 8/7-Homeschool

Occasionally we will see a dollar sign or cent sign used incorrectly.

This sign is incorrect because it uses a decimal point with a cent sign. This incorrect sign literally means that soft drinks cost not half a dollar but half a cent! Take care to express amounts of money in the proper form when performing arithmetic with money.

Numbers that are added are called addends, and the result of their addition is the sum.

addend + addend = sum

# Example 1 Add:

(a) 36 + 472 + 3614

(b) \$1.45 + \$6 + 8¢

Solution (a) We align the digits in the ones 111 36 place and add in columns. Looking 472 for combinations of digits that total + 3614 10 may speed the work. 4122

(b) We write each amount of money \$1.45 with a dollar sign and two places to \$6.00 the right of the decimal point. We + \$0.08 align the decimal points and add. \$7.53

In subtraction the subtrahend is taken from the minuend. The result is the difference.

minuend - subtrahend = difference

# Example 2 Subtract:

(a) 5207 - 948

(b) \$5 - 25¢

Solution (a) We align the digits in the ones place. We must follow the correct order of subtraction by writing the minuend (first number) above the subtrahend (second number).

3207 - 948

4259

OLUTIONS	Control of the Contro
LESSON 4, MIXED PRACTICE	<ol> <li>The rule is "Count down by sevens."</li> <li>14, 7, 0</li> </ol>
. Pattern: Some	
Some more	14. (a) 5 digits
Some more	
+ Some more Total	(b) 7 digits
	(c) 6 digits
Problem: 3 cards	
4 cards	15. (a) 4
5 cards	15. (a) 4
+ 1 cards	(b) 7
13 cards	
	(c) 3
6 + 6 = 12
